

Energy Outreach: West Orange

Sara Reper

New Jersey Comfort Partners

Comfort Partners

- Comfort Partners is a **FREE** energy-saving and energy education program
- They help income-eligible customers save energy and money while increasing safety and comfort

Why Should I Participate?

- Save money
- Reduce energy use
- Reduce utility bills
- Make your home healthier
- More comfortable home

How Can I Participate?

Step 1: Check Eligibility

Step 2: Enroll

Step 3: Home Visit

Step 4: Action Plan/Partnership Agreement

Step 5: Installation

Sustainable Jersey-PSE&G Partnership Program to Support Energy Efficiency in Our Communities

Sustainable Jersey and PSE&G recently announce the SJ-PSE&G Energy Efficiency Partnership Program to support local action to reduce greenhouse gas emissions in New Jersey.

The Program offers wrap-around support, customized resources, and flexible funding options for municipalities to take actions that lower emissions in their buildings, and help residents and local businesses do the same.

-The program allows municipalities, residents and businesses to better manage energy use and leverage PSE&G's high impact, cost-effective-energy-efficiency programs and incentives.

-Increasing energy efficiency for local businesses, residents, and government facilities provides economic, environmental, community and health benefits.

-Municipalities served 100% by PSE&G for electricity and natural gas are eligible to apply.

After Enrollment/During Home Visit

A Certified Building Performance Institute Contractor will reach out to set up a home visit

During the home visit:

- The contractor will go over the Comfort Partners Program
- Conduct a home energy audit
- Including safety and efficiency tests
- Discuss how your home uses energy
- Discuss how the program can help you

At the End of the Home Visit

The contractor will develop an action plan for your home

AND

Fill out a partnership agreement with you

After the Home Visit

- Develop a scope of work
- Return to your home
- Install energy saving measures

What gets installed?

Cost effective energy efficiency measures may include:

- Energy efficient lighting
- Water heaters
- Refrigerators
- Energy saving thermostats
- Insulation, air sealing, duct sealing and repair
- And more!

Energy Saving Tips

- Drafts can cause you to lose heat in your home through leaky windows, doors, electrical outlets, light switches and other openings like your fireplace damper. Reducing air leaks could cut 10 percent from an average home energy bill
- When you are asleep or out of the house, turn your thermostat back 10 to 15 degrees for eight hours and save around 10% a year on your energy bills.
- Turn it off: Don't leave the video game on pause, the computer in sleep mode or the cell phone charger plugged in when you are done with it. Those electronics are still using energy, even when you are not using them.

For Information Visit:
